## Brands we deal with...

"Quality you can afford, Brands you can trust"

## Leave dirt at the door

It may be wet and muddy outside (or, Life can be messy) – but now there's an easy way keep entryways and lobbies looking clean and inviting. Without constant mopping and vacuuming. 3M™ Matting traps dirt, debris and moisture by the door, to help floors throughout your facility stay safer, cleaner-looking, easier to maintain and less likely to be damaged by tracked-in dirt.

*Different types matting as follows*

*Entrance Matting - Wet Area Matting - Counter Matting*

Entrance Matting

Wet Area Matting

- ✓ A wide range of janitorial products for all Industrial , Housekeeping and cleaning needs, made in Italy. Contrary to ABS Plastic Products, that becomes brittle over a Period of time, **FILMOP** brand products are **Poly-propylene**, which is flexible to absorb shock and brunt.
- ✓ **FILMOP** brand products are second generation products, that is, they are made from recycled material which comes with ECO LABEL Certificate also. Also Filmop is a Green certified company.

microfiber systems for all types of surfaces

## SPECIALIZED FILMOP RANGE OF HOSPITAL TROLLEYS

### TOP-DOWN®

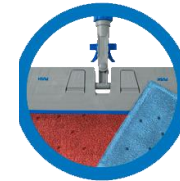

Pre-charged Top-Down Microfiber  
Charging System (multi-mop charging)  
Pocket or Velcro Mops

### Metal-Free Trolley

Filmop has created the very first  
metal-free multipurpose cleaning  
trolley that can enter freely into  
magnetic resonance areas.

- ✓ The highly efficient HEFTER Cleantech cleaning machines do not only shorten the cleaning time and thereby the working hours.
- ✓ The floor is dry and walk-able immediately after cleaning – without slip hazards. Additionally the machines can clean to the wall even in edges. By this ability, manually dry-wiping right after the machine is not necessary which makes the usage of a second worker unnecessary.
- ✓ A special advantage of this unique machine construction is the low vacuum bar width which is not more than the machine width. That provides an easy access through doors or niches!
- ✓ **HEFTER Cleantech** range of machines includes specialized state of the art **Escalator Cleaning Machine** which can even clean the **vertical side** of the Escalator.
- ✓ After Sales Service – In stock all required spare parts for Automatic scrubber dryer machines with full fledged repair facilities.

A wide range of products for floor Restoration /Rectification, Protection, Sealing and Impregnation for all type of chemicals from Faber Chimicas.r.l , Italy for all type of Natural and Artificial stone floors.

Products:-

- ✓ **Stone Sealers and Impregnators** provides efficient protection for materials against dirt, stains, water and rising damp
- ✓ **Polishing Compounds and Abrasives** to maintain the shine on natural stone and to restore flaws caused due to the wear and tear to which surfaces are subjected to.
- ✓ **Stain Removers** which has the capability to remove any type of surface stain and to restore the original appearance of the treated surface.
- ✓ **Professional Cleaning Chemicals** for essential cleaning operations after installation, but also for daily cleaning and extraordinary surface maintenance.
- ✓ **Finishing Products** to bring out the full beauty of a surface and at the same time, to provide effective protection for treated materials.

**STAR SHINE EASY**

🔧 Is there something missing at the construction site? 🔧

# DISYCOTT

Highly concentrated detergent to remove cement residues and inorganic dirt.

ECO FORMULA - FAST ACTING - GENTLE SCENT

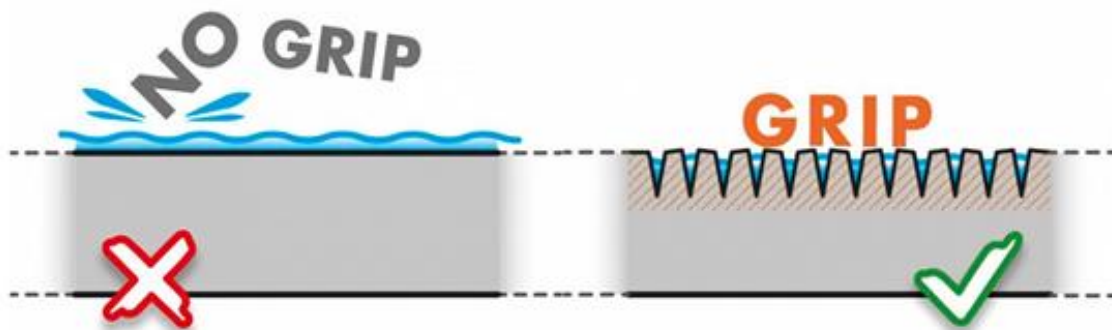

Suitable for porcelain and ceramic tiles, cotto, quartz, and all acid-resistant stones

How does it work?

The anti-slip treatment reacts with the surface creating micro-erosions. These invisible canals enable the water flow enhancing the surface grip in wet conditions.

## MAXIMUM ADHERENCE IN WET CONDITIONS

## BENEFITS

It doesn't alter the original look - No superficial films - It doesn't require maintenance

☀ The product that enhances all materials ☀

# UNIVERSAL *glossy*

Water based cream that is able to **polish marble, granite, agglomerates, porcelain and ceramic tiles**, while achieving the same brightness! ideal for **mixed floors**.

## BEFORE & AFTER

Easy and quick results

-----  
Dirt resistance abilities

-----  
Dry-buffing: no water required!

Turn to the next level of surface cleaning!

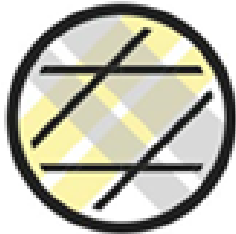

There's no dirt that **DETERFUG** can't vanish

DETERFUG is used every day, all over the world for **heavy duty cleaning** of organic and inorganic dirt, such as cement, limescale, paint, metallic or graphite residues, grease, tire marks etc...

## 4 BENEFITS, 1 PRODUCT:

**Specific to protect materials that are** already damaged

**Suitable for** already installed **surfaces**

**Polishing or Honing the surface** doesn't alter **the protection**

**Also suitable on** low absorbing **natural stones**

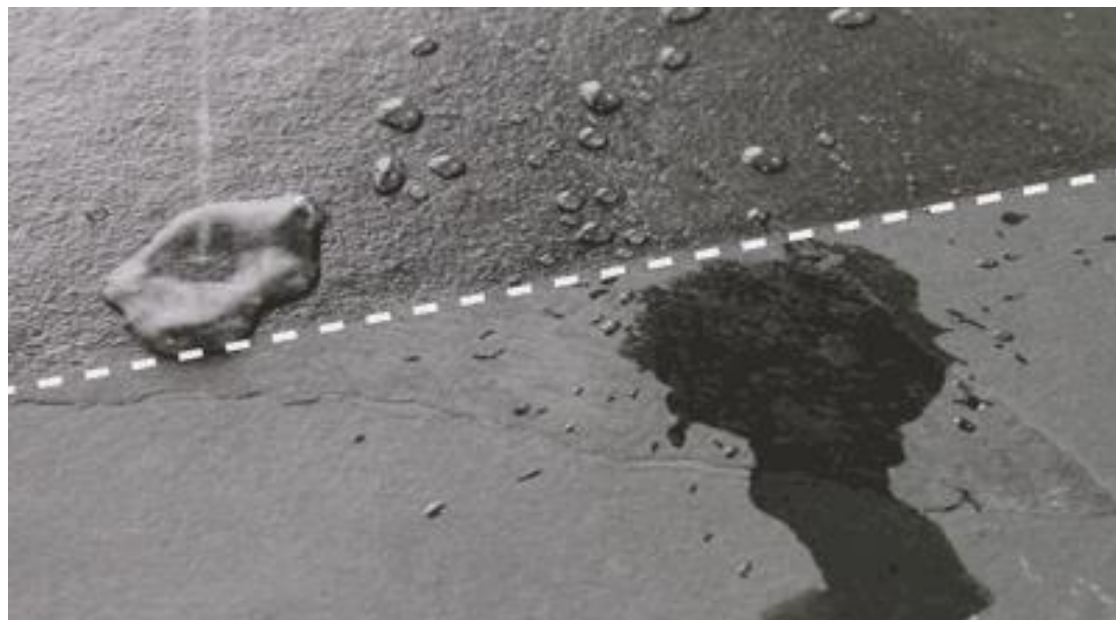

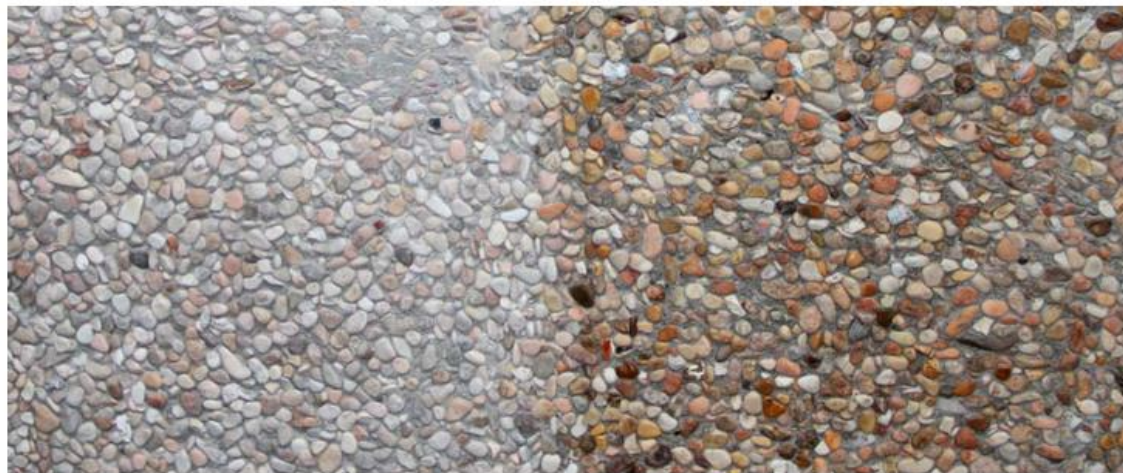

### - DPS -

Innovative protective treatment, efficient on materials that have already been damaged by humidity and salt efflorescences.

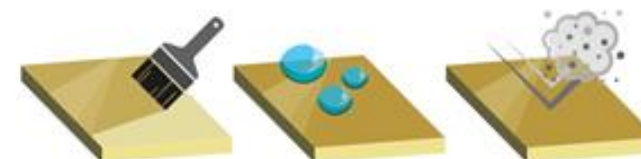

👉 untreated surface / MA 90 effect 👉

It ✨ enhances ✨ (almost) everything

WET LOOK, WATER-OIL REPELLENCY, EASY MAINTENANCE

# MARBLE RESTORATION

## UNLEASH THE BEAUTY AND ELEGANCE OF YOUR MARBLE FLOORING

The marble floor has been a focal point for architectural design from the Romans right through to the present day. The beauty of this natural stone inspired artists and adorned palaces. It's now a stylish contemporary choice for commercial buildings, high end retail and domestic interiors.

If properly cleaned and maintained marble will last a lifetime and more. It is however susceptible to staining, scratching and etching, all of which dull the surface polish and detract from the natural beauty of your stone floors and countertops.

## WE USE DIAMOND ABRASIVE PADS TO BRING YOUR FLOOR BACK TO LIFE

Clean Trend uses specialist polishing powders and creams and top-quality diamond abrasive pads to carry out a marble floor restoration. Our technicians are trained craftsmen who employ a dust-free process to undertake marble floor repair and restoration to deadline and on budget.

Once restored, you may want to consider a maintenance programme to keep your floor in tip top condition and considerably extend the period before your next restoration.

We offer services such as *"Grinding, Honing, Polishing, Crystallization, Sealing, Maintenance, Scratch and Stain removal and Antislip Treatment."*

# GRANITE RESTORATION

## UNLEASH THE BEAUTY AND ELEGANCE OF YOUR GRANITE FLOORING

Granite floor has been a focal point for architectural design from the Romans right through to the present day. The beauty of this natural stone inspired artists and adorned palaces. It's now a stylish contemporary choice for commercial buildings, high end retail and domestic interiors.

If properly cleaned and maintained Granite will last a lifetime and more. It is however susceptible to staining, scratching and etching, all of which dull the surface polish and detract from the natural beauty of your stone floors and countertops.

## WE USE DIAMOND ABRASIVE PADS TO BRING YOUR FLOOR BACK TO LIFE

Clean Trend uses specialist polishing powders and creams and top-quality diamond abrasive pads to carry out a Granite floor restoration. Our technicians are trained craftsmen who employ a dust-free process to undertake Granite floor repair and restoration to deadline and on budget.

Once restored, you may want to consider a maintenance programme to keep your floor in tip top condition and considerably extend the period before your next restoration.

We offer services such as *"Grinding, Honing, Polishing, Crystallization, Sealing, Maintenance, Scratch and Stain removal and Antislip Treatment."*

# LIMESTONE RESTORATION

## ENHANCE THE SOFT LUSTROUS WARMTH OF YOUR LIMESTONE FLOORING

Limestone has an understated elegance, and for that reason it's a popular choice for kitchens and bathrooms. Its natural warmth and lustre is a natural attribute of its soft, open pore structure. Sealers tend to be less effective on limestone floors which makes specialist cleaning important to their maintenance.

A limestone floor doesn't take a high gloss polish like marble as it has a more open pore structure therefore making this limestone more susceptible to deep stains and dirt penetration. It is also more prone to deep etching by acidic and alkaline solutions

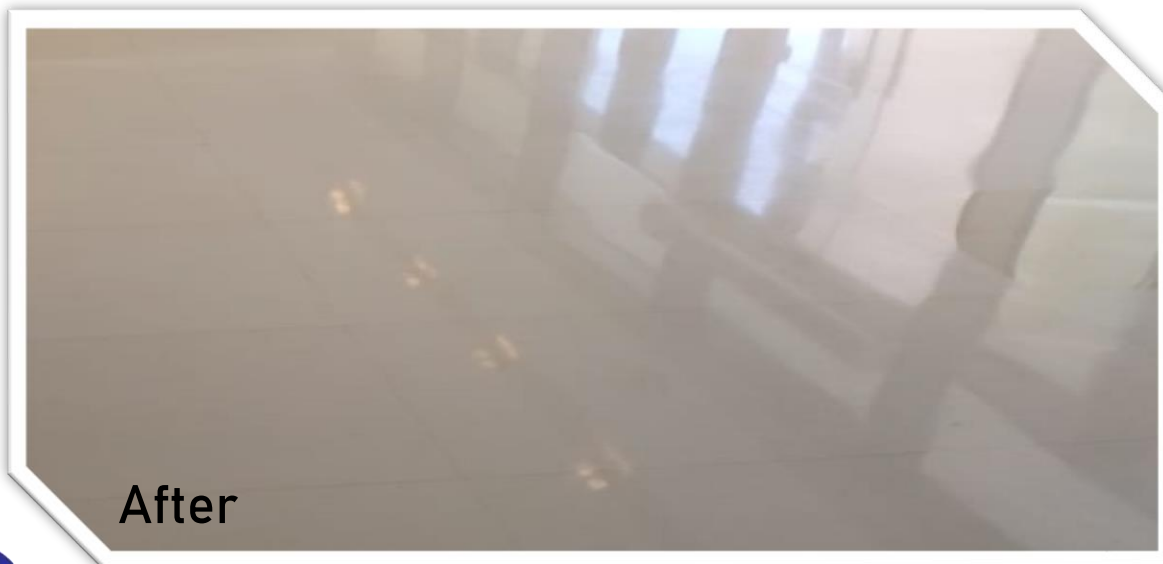

Before

## WE WILL DEEP CLEAN YOUR LIMESTONE TO LIFT STAINS AND DIRT

Clean Trend has restored and maintained thousands of meters of Limestone and we will undertake limestone floor restoration to lift stains and dirt, and use specialist poultices to remove oil and stubborn stains. As part of limestone floor repair our stonemasons mend cracks, fill holes, remove etch marks and re-seal.

The only way to keep limestone looking clean and elegant is to have it regularly maintained. We achieve this with an annual deep clean and re-seal to give it the soft lustre it had when new.

We offer services such as *"Grinding, Honing, Polishing, Crystallization, Sealing, Maintenance, Scratch and Stain removal and Antislip Treatment."*

After

# TERRAZZO RESTORATION

## BRING OUT THE BRIGHTNESS OF YOUR TERRAZZO STONE FLOOR

This beautiful flooring material has recently been rediscovered and is now a popular choice for retail, domestic and commercial interiors. It is a combination of marble chips and Portland or epoxy-based binders, with extra marble chips added during installation for added sheen.

Terrazzo is an extremely durable flooring material but over the years the surface can become dulled as a result of dirt and scratches accumulating deep in the terrazzo pores. A regular 'deep clean' is recommended to maintain the elegant finish of this flooring.

Before

## WE CAN RETURN YOUR TERRAZZO FLOOR ITS ORIGINAL BEAUTY

Clean Trend are experts when it comes to terrazzo floor restoration. We can return your floor to its original beauty by cleaning, polishing, repairing cracks and chips.

We use specialist polishing powders and creams and top-quality diamond abrasive pads to carry out a terrazzo floor restoration. Once your floor is restored, and terrazzo floor repair has been carried out if necessary, we will provide information about regular maintenance in order to keep your floor looking like new.

We offer services such as *"Grinding, Honing, Polishing, Crystallization, Sealing, Maintenance, Scratch and Stain removal and Antislip Treatment."*

# CONCRETE RESTORATION

## BRING OUT THE BRIGHTNESS OF YOUR CONCRETE FLOOR

Bring your old concrete surface to a high-gloss shine and make a great impression on customers and employees by polishing your floor. There are two main methods for concrete polishing—wet and dry polishing—but both are multi-step physical process that involve sanding the surface with increasingly fine grits.

Polishing actually densifies the concrete on a molecular level, making it stronger and harder, though still slightly porous. Despite its glassy surface, polished concrete is not slippery, making it a great choice for high-traffic lobbies and foyers.

After

Before

## WE CAN RETURN YOUR CONCRETE FLOOR ITS ORIGINAL BEAUTY

Clean Trend are experts when it comes to concrete floor restoration. We can return your floor to its original beauty by cleaning, polishing, repairing cracks and chips.

We use specialist polishing powders and creams and top-quality diamond abrasive pads to carry out a concrete floor restoration. Once your floor is restored, and concrete floor repair has been carried out if necessary, we will provide information about regular maintenance in order to keep your floor looking like new.

We offer services such as “Grinding, Honing, Polishing, Crystallization, Sealing, Maintenance, Scratch and Stain removal and Antislip Treatment.”

# ARTIFICIAL STONE RESTORATION

(Ceramic, Porcelain, Engineered Stone)

## BRING OUT THE ORIGINAL LOOK OF YOUR ARTIFICIAL STONE FLOOR

This beautiful flooring material has recently been rediscovered and is now a popular choice for retail, domestic and commercial interiors.

Ceramic, Porcelain and Engineering Stone are extremely durable flooring material but over the years the surface can become dulled as a result of dirt and scratches. A regular 'deep clean' is recommended to maintain the elegant finish of this flooring.

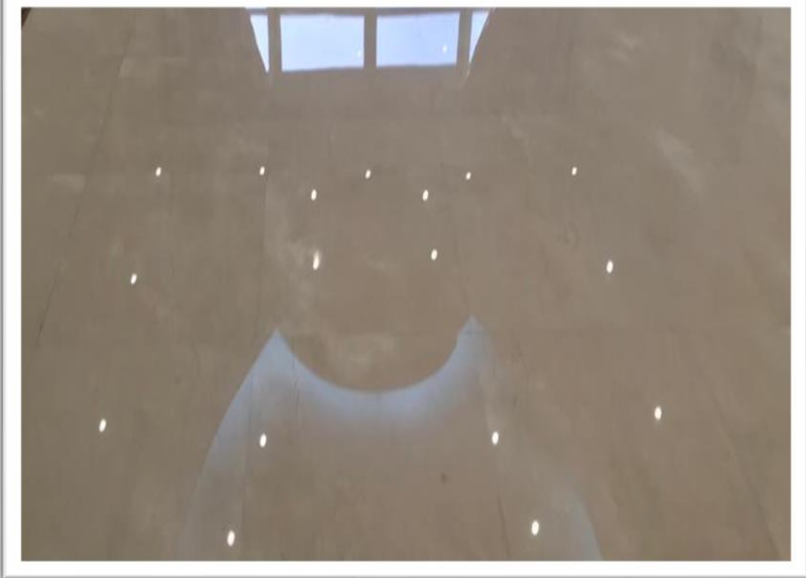

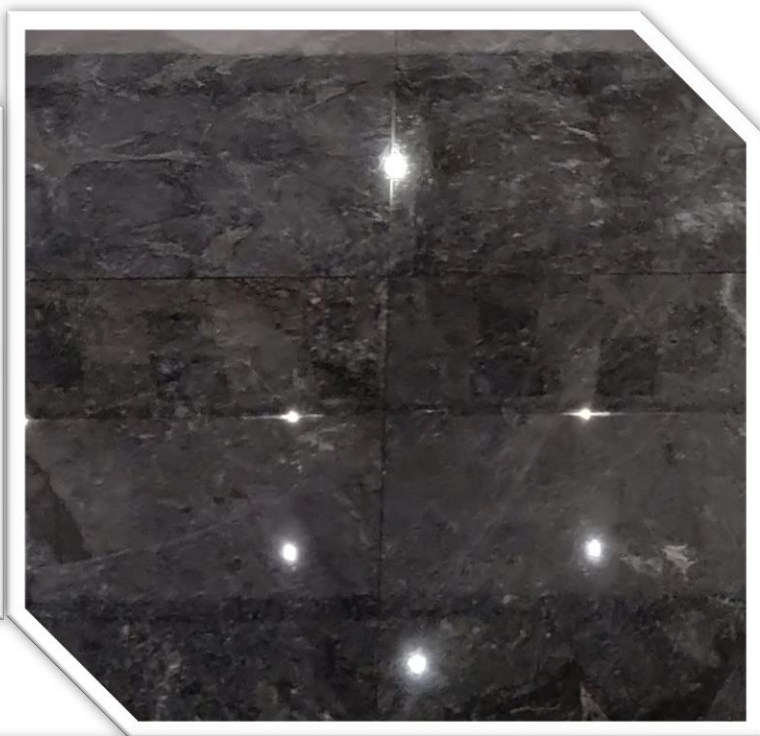

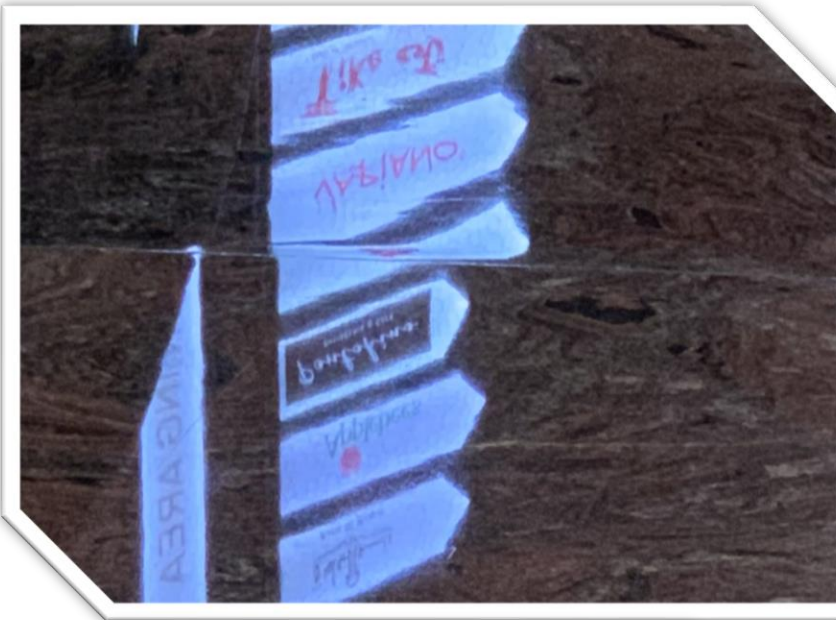

## WE CAN RETURN YOUR ARTIFICIAL STONE FLOOR ITS ORIGINAL BEAUTY

Clean Trend are experts when it comes to artificial floor restoration. We can return your floor to its original beauty by cleaning, polishing, repairing cracks and chips.

We use specialist polishing powders and creams and top-quality diamond abrasive pads to carry out Ceramic, porcelain and Engineered stone floor restoration. Once your floor is restored, we will provide information about regular maintenance in order to keep your floor looking like new.

We offer services such as "Grinding, Honing, Polishing, Crystallization, Sealing, Maintenance, Scratch and Stain removal and Antislip Treatment."
